Air Thahiti Nui AIRBUS A340-300

Air Tahiti Nui

This Air Tahiti Nui AIRBUS A340-300 is a model based on the AIRBUS A340-300 airplane which connects Tahiti and Tokyo's Narita airport, from the French Polynesian airline Air Tahiti Nui. The tail is decorated with a picture of a pure white Tiare flower, the national flower of Tahiti, and each plane is named after one of Tahiti's islands, with names such as "The Bora Bora." Onboard, flight attendants welcome passengers with the wonderful hospitality Tahitian people are known for.

The AIRBUS A340-300 measures 63.7m in length, with a wingspan of 60.3m and a height of 16.91m. It has a maximum weight of 275.0 tons, and a flight distance of 10,400km.

Completed Model (Total length)	About 575mm (Scale - About 1:120)
(Total width)	About 510mm
Pattern	18 pages
Assembly Instructions	16 pages

This model was designed for Papercraft and may differ from the original in some respects.
*Bulid the model by carefully reading the Assembly Instractions, in the parts sheet page order.

Assembly Process

Attach the parts in order.

A1~Q3 No. of Parts

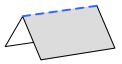
*Glue, scissors and other tools may be dangrous to young children so be sure to keep them out of the reach of young children.

Assembly Tip

- Small pieces will be easier to cut out if you fold along the lines first. Cut them out after you have folded them.
- Before gluing each piece, be sure to compare its shape to the corresponding surface to ensure it is the correct piece.

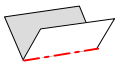
Folds & Marks

Trace along the folds with a ruler and a used pen (no ink) to get a sharper, easier fold.



Mountain fold line

Cut out



Valley fold line

Assemble in the direction indicated by the arrow

Glue spot

Each glue spot has a mark indicating how to attach it.

- Glue to the front of the other part
- Glue to the rear of the other part
- Glue within the same part
- Glue the rear of this part

Tools

Scissors, glue (We recommend craft glue), ruler, tweezer, stencil pen, used pen (no ink).
