SKYARMΣ

1/43 scale

Supervision: **Nihon Kikai Kogyo Co., Ltd.**

Unlike a straight ladder, the Skyarm ladder articulates in several places, making it possible to avoid utility wires and other obstacles encountered during firefighting and rescue work. By attaching a fixed waterway to the ladder sections, a large volume of water can be deployed quickly and accurately. The Skyarm Sigma features a set of push-button jacks that can be extended to support the weight of the truck and maintain a stable, perpendicular platform, while the three-section telescoping ladder can play a role in rescue situations that require considerable horizontal reach. Because the floor of the platform basket remains horizontal, aerial operations can be carried out with added safety.

Maximum height:	25.5m
Overall length:	10000mm
Overall width:	2490mm
Overall height:	3780mm

■ Parts list (pattern) : Ten A4 sheets (No. 1 to No. 10)

■ No. of Parts: 76

Build this model with careful reference to the Assembly Instructions.
