

Green-winged macaw

The green-winged macaw inhabits low altitude tropical rain forests of Central and South America. It is the second biggest bird in the macaw family, after the hyacinth macaw. Green-winged macaws have a wingspan of about 125 cm with bodies measuring around 100 cm, and although they live in groups they mate with the same partner for life. Despite their large size, they are gentle, docile birds and live extremely long lives, having an average lifespan of 50 to 60 years in captivity. Their striking, brightly colored bodies allows them to easily camouflage themselves from predators in the Amazon, and also makes them very popular among birdwatchers. They possess an interestingly shaped beak which is extremely powerful, strong enough to break open tough nuts and other objects. Also, their tongue is very similar to the human tongue, meaning they are good at impersonating people's voices. This paper craft model is about half the size of a real green-winged macaw.

Assembly Instructions

- 1) Carefully cut out the parts.
- 2) Make mountain folds and valley folds along the dotted lines, as indicated by the directions.
- 3) Attach the parts in order.
(Read the assembly instruction for more information.)
- 4) Your Paper craft model is finished.

Tools

Scissors, glue (We recommend a strong adhesive such as woodwork glue.)

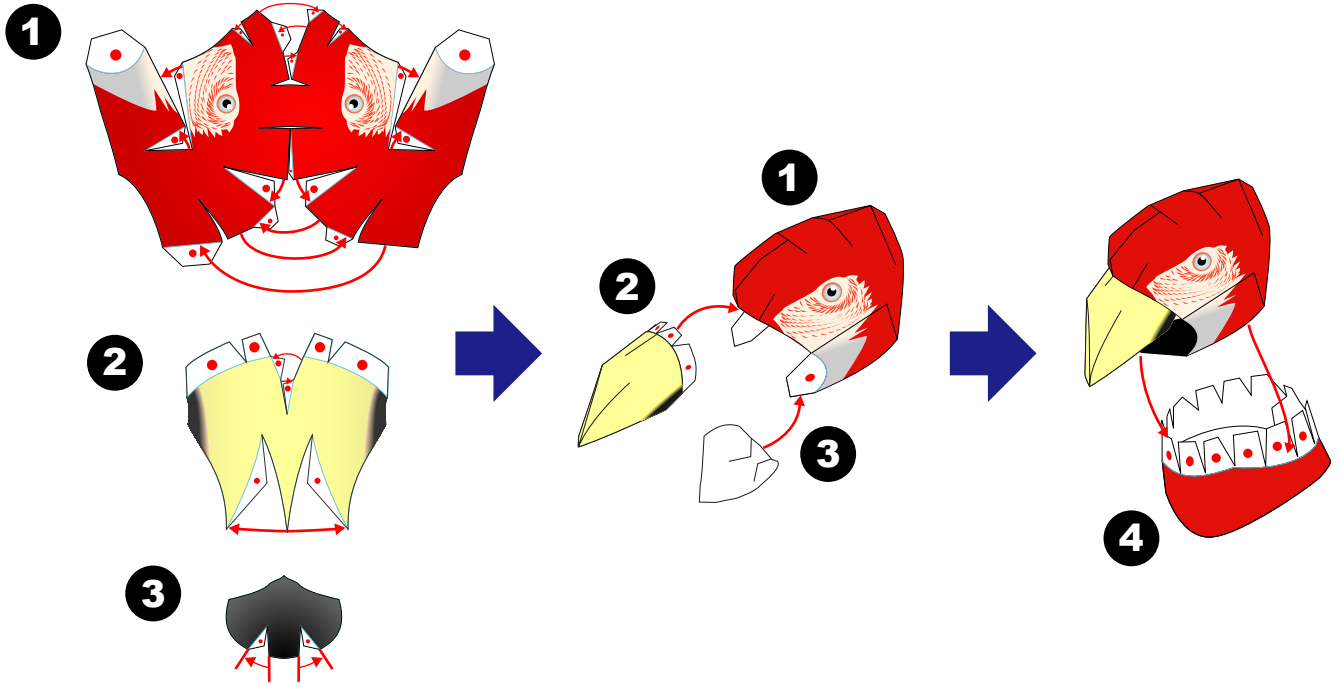

Caution

- Keep glue away from small children.
- Be careful not to cut your fingers when using scissors.

Notation Key

	_____	Scissors line
	_____	Cut in line
	_____	Glue up to this line
	-----	Mountain fold
	-----	Valley fold
	●	Glue spot

Assemble 1 2 3 and attach 4 to make the head.

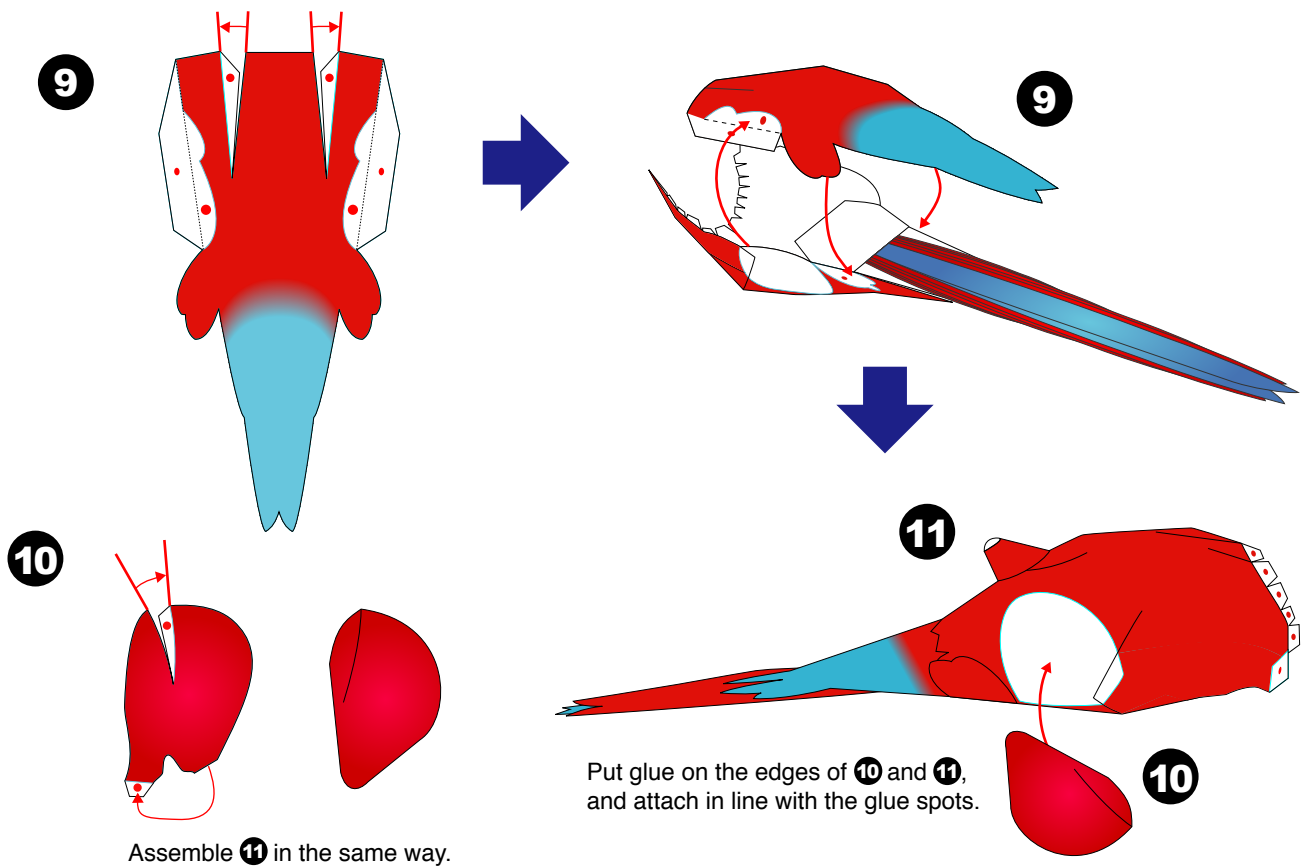

Assemble 5 6 7 and make the tail feathers.

Assemble **8** to make the flanks, and attach them to the tail feathers.

Assemble **9** **10** **11** and attach them to the flanks to complete the body.

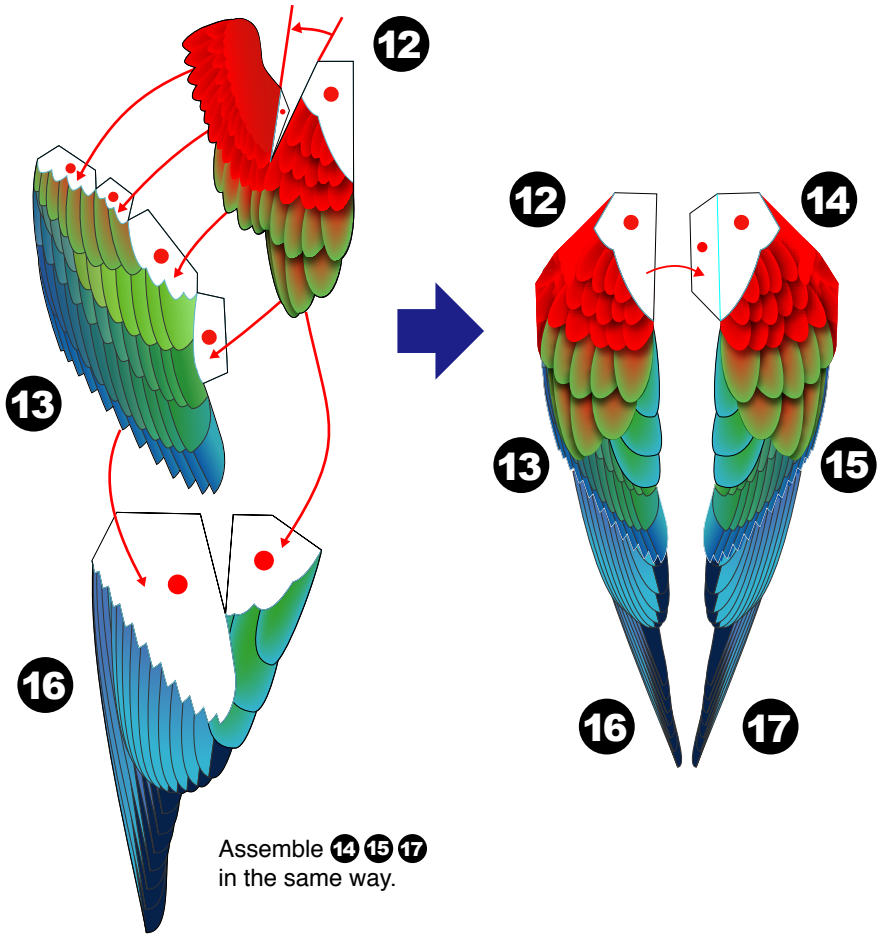

Assemble 12 13 16 and 14 15 17 to make the wings.

For 16 and 17, attach A and B at the reverse side, and follow the lines on A to cut out the piece.

Match the colors on the corners.

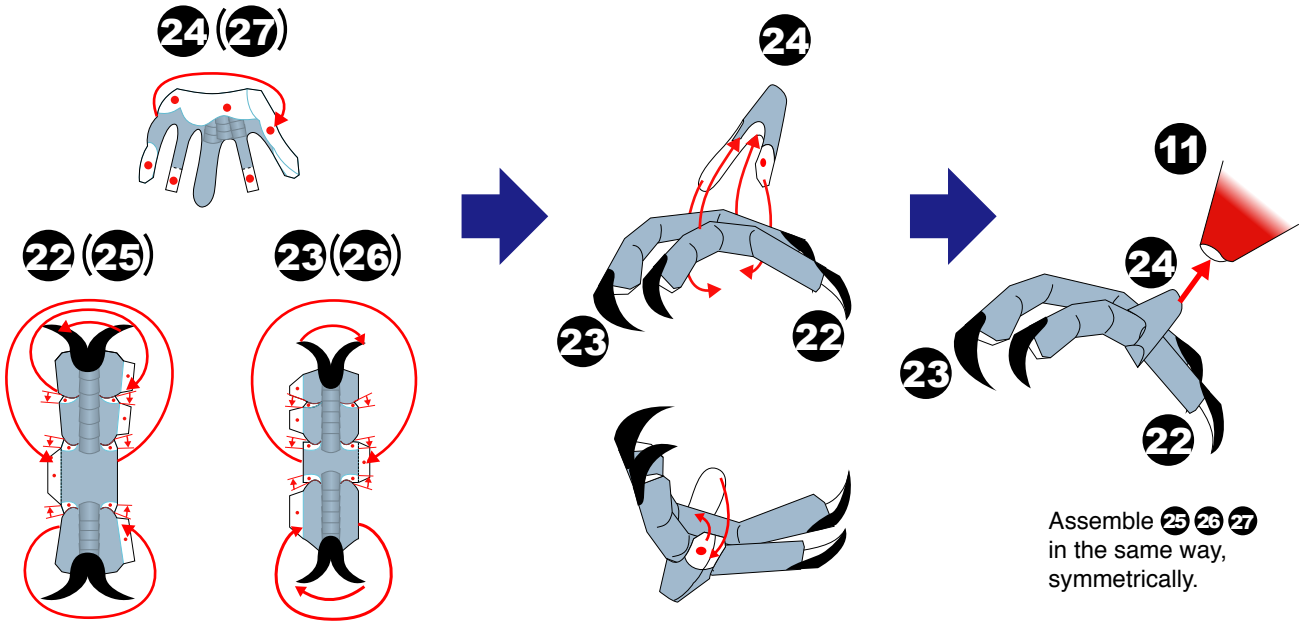

Assemble 14 15 17 in the same way.

Assemble 18, and attach the head to the wings.

For the parts of the wings without glue tabs, put glue on the edges and attach them to the body.

Assemble parts 22 to 27, and attach the legs.

Assemble 19, 20 and 21, make the perch, and you're done!
