Caucasus beetle

Editor:  THE NATIONAL SCIENCE MUSEUM
国立科学博物館

Scientific name: *Chalcosoma chiron*. Caucasus beetles are found at elevations of around 1,000 m in the mountain ranges of Sumatra, Java, the Malay peninsula, and Indochina. Male Caucasus beetles are 62-133 mm in length; females measure 53-60 mm. The largest native Asian beetles, Caucasus beetles feature a long three-point horn and a short single-point horn. These insects are aggressive and armed with sharp claws. Habituated to high altitudes, these beetles are tropical but are sensitive to excessive heat. They prefer temperatures around 15-20°C. This beetle is also known as the King of the East.

*This model was designed for Papercraft and may differ from the original in some respects.

■ Parts list(pattern): Six A4 sheets (No.1 to No.6)

■ No. of Parts: 83

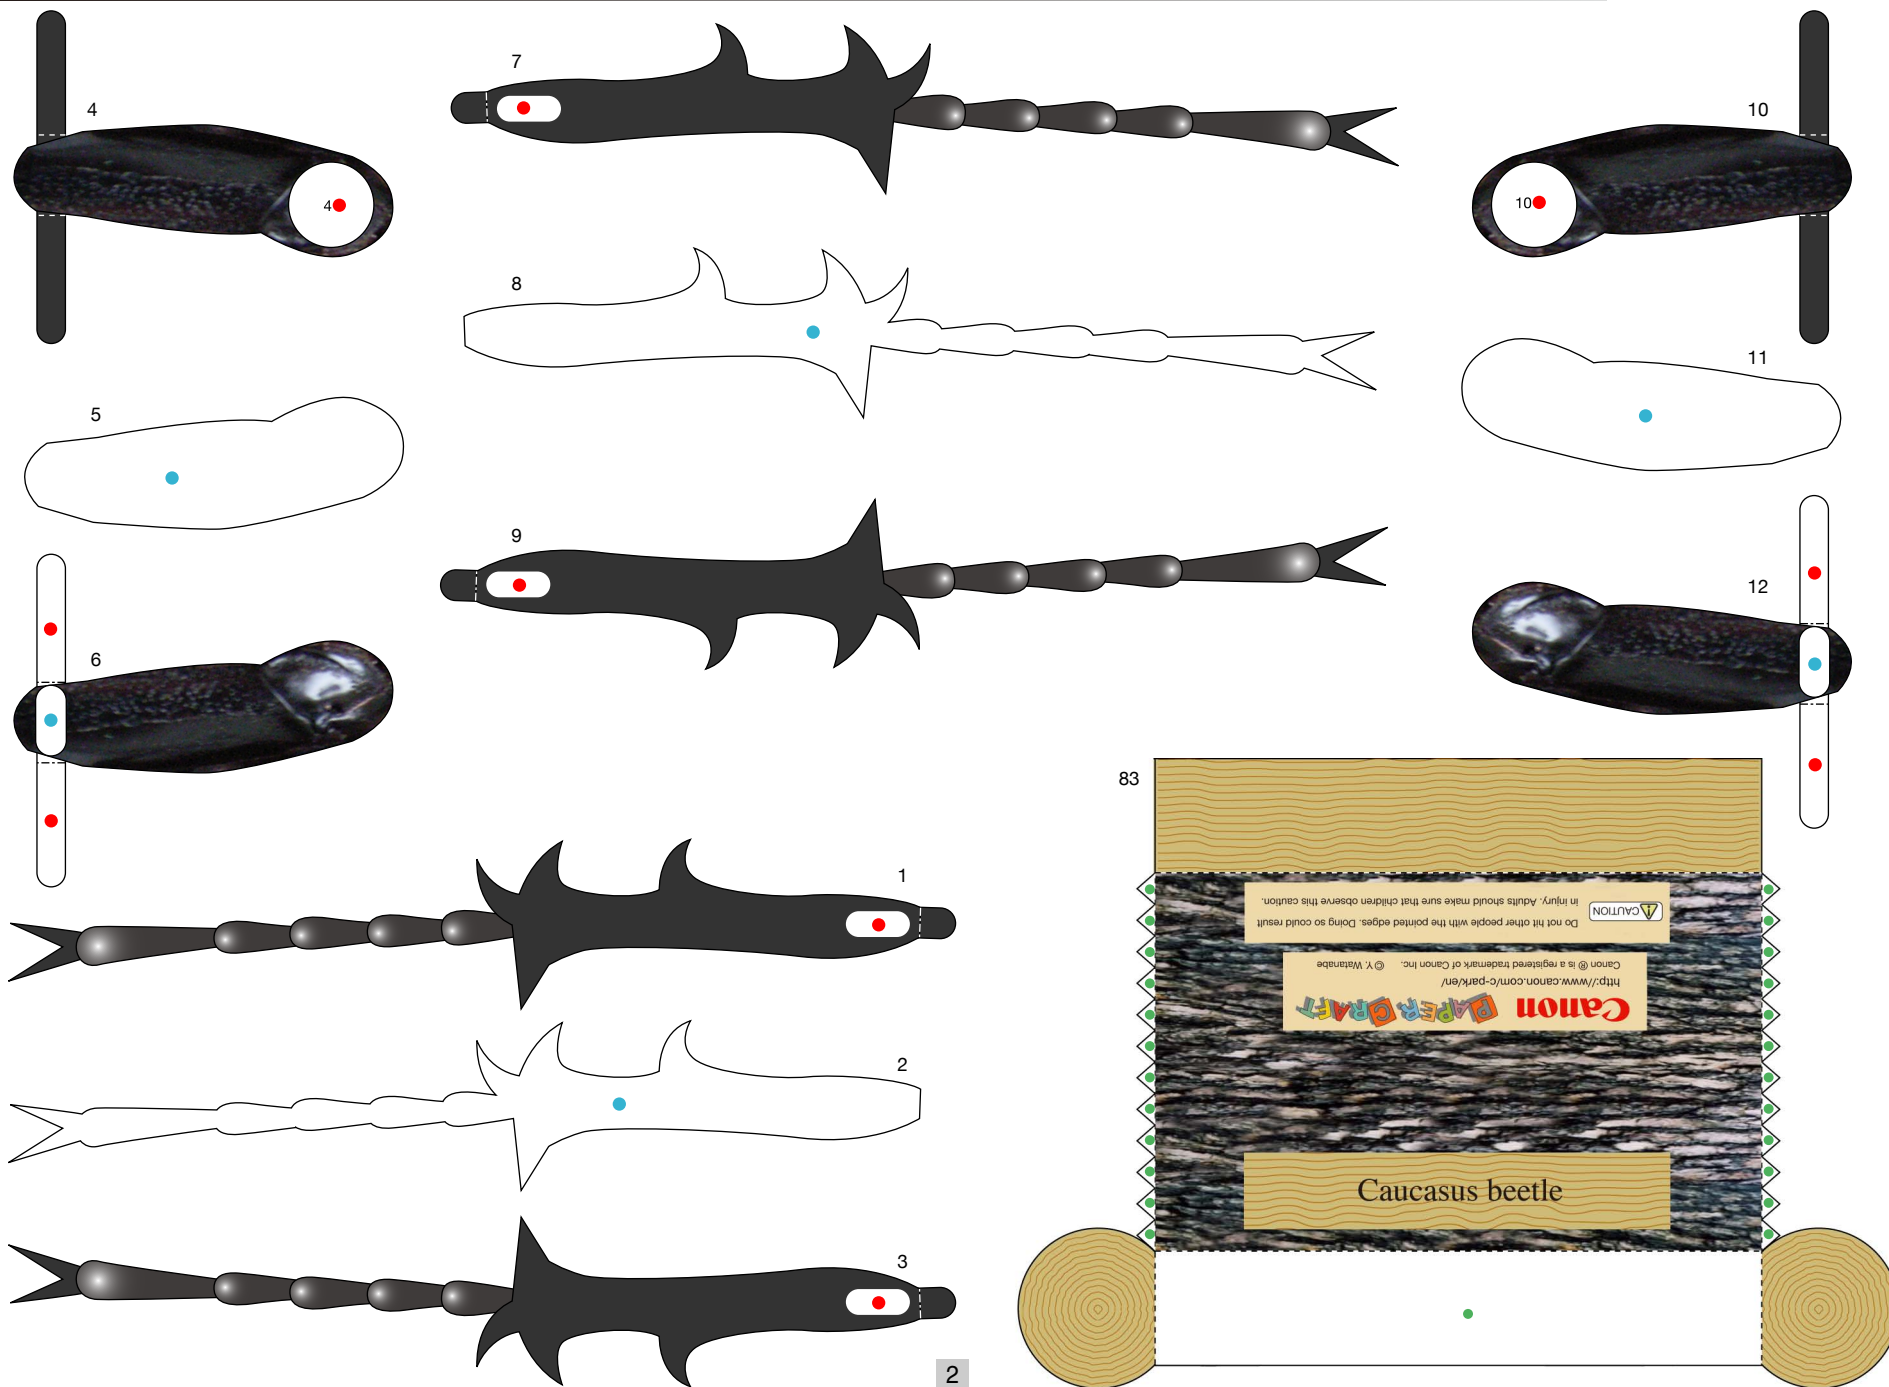

*Build the model by carefully reading the Assembly Instructions, in the parts sheet page order.
