

Assembly Instructions

..... **Mountain fold** (dotted line)
*Make a mountain fold.

- - - - - **Valley fold**
(dashed and dotted line)
*Make a valley fold.

▲ **Black triangle**
Glue here

——— **Scissors line** (solid line)
*Cut along the line.

——— **Cut in line** (solid line)
*Make a cut.

△ **White triangle**
Glue the back

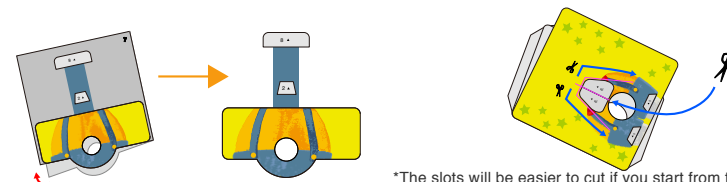

scissors, paste, a used ballpoint pen (tracing along the fold lines makes them easier to fold)

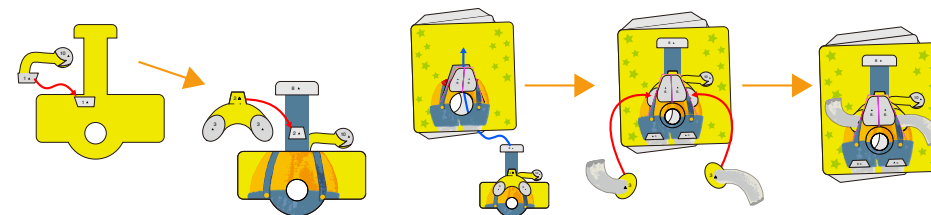

Caution: Glue, scissors, and other tools may be dangerous to young children so be sure to keep them out of the reach of young children.

- 1 Cut out the parts and fold them along the fold lines on each. Fold the part E in half and glue it, then cut out according to their shape. Cut slots along the cut in lines on the base.

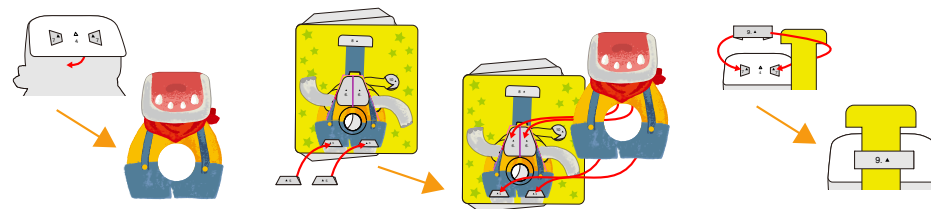

*The slots will be easier to cut if you start from the hole, cut along the line and then branch off to the left and the right.

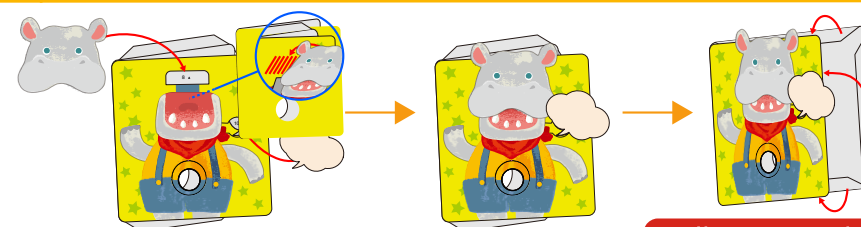

- 2 Attach parts A and B to glue spots 1 and 2 on part E, respectively. Then, feed the tip of part E (glue spot 8), the tip of part A (glue spot 10) and part B's glue spots 3 through the slot you have cut out on the base, as shown in the diagram. Attach the hands to glue spots 3 on part B.

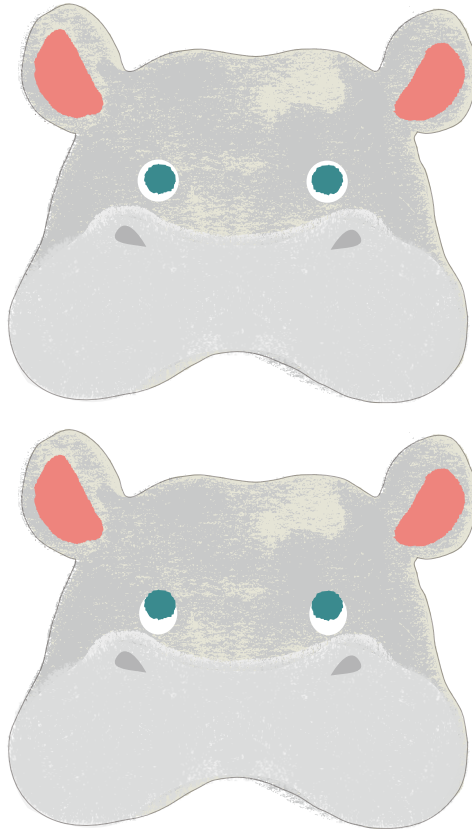

- 3 Attach 4 to the back of the body, attach part C to glue spots 5 on the base, and then attach the bottom of the body to there. Attach the back of the body to glue spots 6 on the base. Insert part E between part D and the back side of the body, and attach glue spots 7.

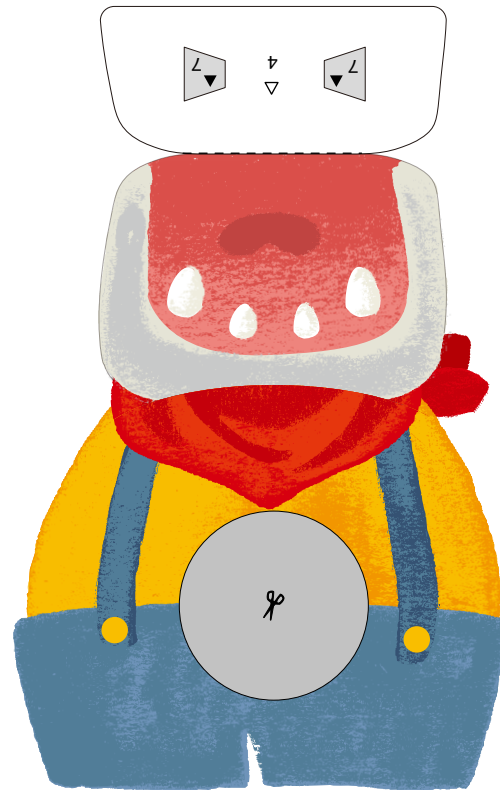

- 4 Align the hole in the base with the center of the hole on part E, and attach the head to glue spot 8, referring to the position in the diagram. Attach glue spot 9 (on the back of the head) to the base, and attach the speech bubble to glue spot 10. Attach the front and back of the base together at the glue spots, and you're done!

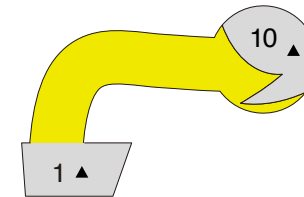

●Head

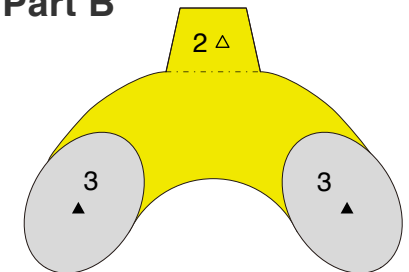

●Body

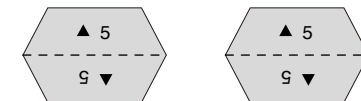

●Part A

●Part B
