

Sugar Glider

The sugar glider is a marsupial, meaning that it carries its young in a pouch, just like the koala and the kangaroo. It lives mainly in treetops, gliding between trees by stretching out the membranes that connects its front paws to its back paws. Its name comes from its love of fruit and other sweet foods. They can be raised as pets as it is said that young sugar gliders can form strong bonds with their owner.

*Assembly instructions on pages 1 and 2, and pattern on page 3.

★ Assembly Instructions

- Carefully cut out the parts.
- Fold along the dotted lines, making mountain or valley folds as indicated.
- Follow the order indicated in the instructional diagrams, and attach the parts to assemble.
(Read the Explanation of Symbols for more information.)
- Your paper craft model is finished!

★ Tools

Scissors, glue (We recommend craft glue.)

★ Caution

Keep scissors and glue away from small children.
Be careful not to cut your fingers when using scissors.
Fold the folding lines before gluing.

★ Explanation of Symbols

————— Cut line

- - - - - Mountain fold

- · - · - Valley fold

△ Numbered glue tabs
Glue the parts together in the order indicated by the numbers.

△ Glue tabs with symbols and part names
These tabs are to be glued onto the matching parts, which name is indicated on the tab.

★ **Assembling the Sugar Glider**
