

"MUMMY ATTACK" VIGNETTE INSTRUCTIONS

step 1

step 2

step 3

step 4

step 5

step 6

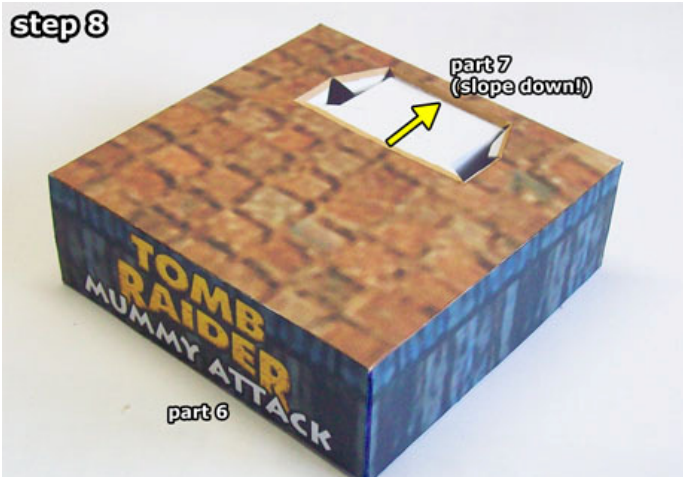

Now glue the outside of the sarcophagus (parts 4+5) over the inside (parts 1-3). Take your time to glue all the edges and glueing tabs together properly.

step 7

Cut out the hole on part 6 and glue together the sides, but before closing the bottom, cut out and glue together part 7...

step 8

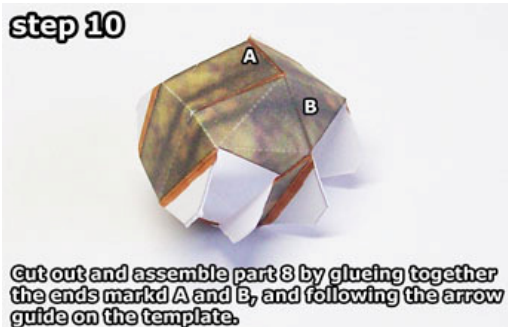

...and glue part 7 underneath the hole on part 6, so that the tallest side is at the front (so that it slopes down towards the back).

step 9

That way, the sarcophagus will tilt a little bit backwards when you glue it on top of the stand.

step 10

Cut out and assemble part 8 by glueing together the ends markd A and B, and following the arrow guide on the template.

step 11

Assemble part 9...

step 12

...and then glue it to part 8, together with the rest of the right leg (parts 10-13). Do the same for the left leg (parts 14-18).

step 13

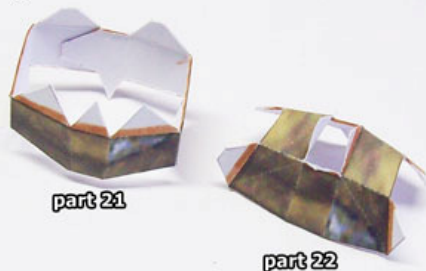

Cut out the small, yellow slit on part 19 before glueing it to the rest of the legs.
Then push the two bigger glueing tabs on the bottom of part 20 through the slit and between the backside of part 19 to glue it on top of part 19.

step 14

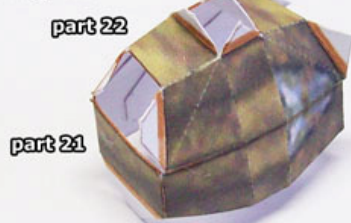

The result should like like this.

step 15

Cut out and assemble parts 21 and 22...

step 16

...and then glue them together like so.

step 17

Make sure to score and fold all the fold lines on part 23 so you can shape it as shown here...

step 18

...so you can glue it to the shoulder like so.

step 19

Keep assembling and glueing on the rest of the right arm (parts 24-28).

step 20

Now shape and assemble parts 29 and 30...

step 21

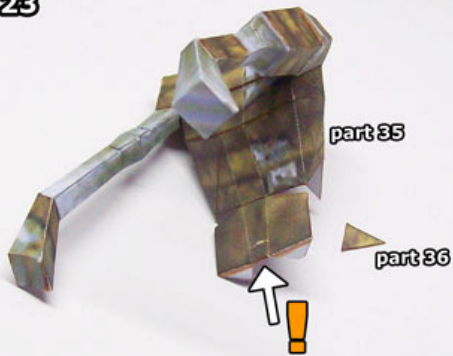

...and glue them to the other shoulder like so.

step 22

Keep assembling and glueing on the rest of the left arm (parts 31-34).

step 23

Cut out the small, yellow slit on part 35 before glueing it to the bottom of the mummy's torso (leave the bottom open until last to make it easier). Part 36 can be used to cover up the loose piece of mummy bandage. ;o)

step 24

With the bottom closed, it will look like this. Now cut out and assemble the neck (part 37)...

step 25

...and then glue part 37 on top of the torso, and push the two bigger glueing tabs on top of part 20 through the slit and between the back-side of part 35 to glue the mummy's torso to the legs.

step 26

Take your time scoring and folding all the fold lines on part 38 to make it easier to glue together like so.

step 27

Glue on part 39, and cut out and assemble part 40...

step 28

...so that you can glue it on too.

step 29

Glue the head on top of the mummy's neck!

step 30

The mummy won't be able to stand on its own, so use some glue or some doublesided tape underneath its feet. Thank you for building a Ninjatoes' papercraft model! www.kickme.to/ninjatoes
