### 3D Fozzie Bear Papercraft

### Instructions

1. Print out Fozzie on regular paper or cardstock and cut out all of the pieces. Cut slits along the solid brown line on the A and B tabs. Do not cut along the dashed lines -- this is where you will fold the paper.
2. Fold the dashed line at the top of Fozzie's legs toward you. Make all other folds along the dashed lines away from you.
3. Glue the two A tabs to the white side of Fozzie's back. Glue the B tab to the white side of Fozzie's front. Now, close his chest by gluing the D and C tabs in place.
4. Fold and glue his arms together along the dashed lines so the design is two-sided. Attach the arms by folding the E and F tabs and gluing them to the corresponding spot on the sides of Fozzie's body. Make sure his hand holding the hat rests across the front of his body. Your Fozzie is now complete!
